

DO YOU WANT TO IMPROVE YOUR STRATOCASTER?

Do you want MORE pickup tones? These are simple ways how you can improve your standard Stratocaster, with either SSS, HSS, HSH, or HH pickup configurations. Uses mini switches to put each pickup **Off** or **On**, in *normal-phase* or *reverse-phase*, and in **Parallel** or **Series** – and in any combination (*things a blade switch cannot do.*)

Your SSS Stratocaster

Your *stock* SSS Stratocaster (*or clone*) uses a 5-way blade switch to give you 5 pickup tones. You can improve it by installing our upgrade that gives you 35 pickup tones – seven times the number of pickup tones that your guitar has. This simple upgrade comes in four upgrade colors. You can choose the “bare” upgrade (*uses your own pickups*) or the “loaded” upgrade (*has our AweSome high-output pickups*). It also includes Treble Bleed your guitar doesn’t have.

Your HSS Stratocaster

Your *stock* HSS Stratocaster (*or clone*) uses a 5-way blade switch to give you 5 pickup tones. You can improve it by installing our upgrade that gives you 68 or 102 pickup tones – twenty times the number of pickup tones than your guitar has. This simple upgrade comes in four upgrade colors. You can choose the “bare” upgrade (*uses your own pickups*) or the “loaded” upgrade (*has our AweSome high-output pickups*). It also includes Treble Bleed your guitar doesn’t have.

Your HSH Stratocaster

Your *stock* HSH Stratocaster (*or clone*) uses a 5-way blade switch to give you 5 pickup tones. You can improve it by installing our upgrade that gives you 35 pickup tones – seven times the number of pickup tones that your guitar has. This simple upgrade comes in four upgrade colors. You can choose the “bare” upgrade (*uses your own pickups*) or the “loaded” upgrade (*has our AweSome high-output pickups*). It also includes Treble Bleed your guitar doesn’t have.

Your HH Stratocaster

Your *stock* HH Stratocaster (*or clone*) uses either a 3-way blade switch to give you 3 pickup tones, or a 5-way blade switch to give you 5 pickup tones. You can improve it by installing our upgrade that gives you 68 or 102 pickup tones – twenty times the number of pickup tones than your guitar has. This simple upgrade comes in four upgrade colors. You can choose the “bare” upgrade (*uses your own pickups*) or the “loaded” upgrade (*has our AweSome high-output pickups*). It also includes Treble Bleed your guitar doesn’t have.
